Audthor Index to 1987

Bai Shouli See Zhang Changqun 155
Cai Ping
——Jin Yong; Yu Zhiqing; Wang Zhanwen
A criterion for transition from bubbling to turbulent fluidization 234
Cai Zhenye See Chen Jiabin 190; 200
Cai Zhiliang
——Zhou Xingfeng; Hong Ruicha
Study on ebulliometric method and leaning ebulliometer 91
Chang Juzhen See Shen Shubao 31
Chen Jiabin
——Cai Zhenye; Lin Jifang
Boillng heat transfer on surfaces with artificial nucleation sites
(I) Effect of cavity size, cavity density on bubble departure diameter and frequency 190
(II) Mechanism of nucleate boiling and effect of cavity size, cavity density on boiling heat transfer 200
Chen Minheng See Zhang Qihong 162; 173; 183
Chen Qiang See Gong Sunling 245
Chen Yuanming See Huang Hongding 255
Chu Jiaying
——Tang yingnan; Jiang Tiqian
Mass transfer in dripping plate column for non-Newtonian fluids 218
Fan Zhongliang
——Feng Yuru; Qiu Yuantao; Shi Jun
A preliminary study on liquid membrane separation in rotating disk contactors with preforated disks 208
Feng Yuru See Fan Zhongliang 208
Gong Sunling
——Xu Zhihong; Chen Qiang
Improved simulation system of pulverized coal gasifier 245
He Yaowen See Sun Zhifa 104
Hong Ruicha See Cai Zhiliang 91
Hou Yufen
——Li Zhoushu
Investigation of methine type disperse dyes of benzothiophen-one derivatives (I) Study on the relation between dyes molecular structures and their absorption spectra 130
Huang Hongding
——Chen Yuanming; Zhang Songmin
Internal thermosyphon reboiler 255
Jiang Chusheng See Sun Zhifa 104
Jiang Gengming See Zhu Changluo 115
Jiang Tiqian See Chu Jiaying 218
Jin Yong See Cai Ping 234
Li Zhou
——Zhou Yongchuan
Kinetics of the extraction of cobalt with extractant P5709 55
Li Zhoushu See Hou Yufen 130
Lin Cheng See Wang Changtai 17
Lin Jifang See Chen Jiabin 190; 200
Liu Hongqin
——Wang Shaokun; Tien Weimin; Shi Jun
UNIFAC parameters from gas liquid chromatography 43
Qui Yuantao See Fan Zhongliang 208
Shen Huamin
——Weng Menyan; Wei Boyi
Solubility of ammonia in water in multicomponent system under high pressure 1
Shen Shubao
——Wang Shaokun; Chang Juzhen; Shi Jun

Study on chromatographic slope method for reducing parameters of excess Gibbs energy models 31
Shi Jun See Shen Shubao 31; Liu Hongqin 43; Fan Zhongliang 208
Sun Zhifa
——He Yaowen; Jiang Chusheng
Exergy analysis of distillation stages by non-equilibrium thermodynamics 104
Tang Yingnan See Chu Jiaying 218
Tien Weimin See Liu Hongqin 43
Wang Changtai
——Lin Cheng
Prediction of breakthrough curves for fixed beds 17
Wang Qingzi See Zhu Changluo 115
Wang Shaokun See Shen Shubao 31; Liu Hongqin 43
Wang Yuxin See Yu Kuotsung 71
Wang Zhanwen See Cai Ping 234
Wei Boyi See Shen Huamin 1
Weng Menyan See Shen Huamin 1
Xu Zhihong See Gong Sunling 245
Yi Baolian
A new method for measuring the loss of current efficiency owing to cathodic side reactions in chlorate production 227
Yu Kuotsung
——Wang Yuxin
Optimal operation of batch distillation 71
Yu Zhiqing See Cai Ping 234
Yuan Jitang See Zhang Jianhou 143
Yuan Weikang See Zhang Qihong 162; 173; 183
Zhang Changqun
——Zhao Chuanjun; Bai Shouli
Calculation of thermodynamic properties of real fluids and vapor-liquid equlibria by using a canonical partition function (I) Thermodynamic properties of pure fluids 155
Zhang Jianhou (Chien-Hou Chang)
——Yuan Jitang
A correlation for liquid diffusion coefficient with concentration 143
Zhang Qihong
——Chen Minheng; Yuan Weikang
Studies of adiabatic fixed-bed reactors
(I) Ignition of reactors 162
(II) Steady-state temperature profiles 173
(III) Ignition and temperature profiles in radial flow reactors 183
Zhang Rongxian See Zhu Changluo 115
Zhang Songmin See Huang Hongding 255
Zhang Zheng
A method for sepearting velocity fluctuation and temperature fluctuation in the course of measuring turbulent parameters 81
Zhao Chuanjun See Zhang Changqun 155
Zhou Xingfeng See Cai Zhiliang 91
Zhou Yongchuan See Li Zhou 55
Zhu Changluo
——Zhang Rongxian; Jiang Gengming; Wang Qingzi
A mathematical model and simulation for non-isothermal gas absorption with chemical reaction 115
